

Our Commitment to Carbon Reduction

Last Update: 1st August 2026

At Smart Skills Academy, we recognise the importance of taking action on climate change. We are committed to playing our part in reducing our environmental impact and working towards a carbon neutral future.

Our Approach:

As a primarily digital business, we minimise physical waste and reduce carbon output by delivering our services online.

We limit unnecessary travel by working remotely and encouraging virtual collaboration wherever possible.

We aim to use cloud platforms, hosting, and tools that are committed to sustainability and carbon reduction.

We are continuously exploring ways to improve our sustainability practices as we grow.

Looking Ahead:

We are working towards a long-term goal of carbon neutrality and will continue to assess and improve our practices in line with this aim.

This commitment forms part of our wider values — to run a responsible, ethical business that supports both people and the planet.
